# OUR SERVICES

## Business Management

Parun provides comprehensive business management services tailored to help businesses enhance performance, streamline operations, and achieve sustainable growth. With a focus on strategic planning, organizational development, financial management, and operational efficiency, Parun partners with businesses to identify challenges and implement practical, results-driven solutions.

## Mining & Exploration

Parun offers specialized mining and exploitation services designed to support mining businesses throughout the entire resource extraction lifecycle. With a strong focus on efficiency, sustainability, and regulatory compliance, Parun provides expert guidance in exploration, feasibility studies, mine planning, operational optimization, and environmental management.

## Energy & Infrastructure

Parun provides integrated energy and infrastructure management services aimed at optimizing project performance, sustainability, and long-term value. With expertise spanning renewable and conventional energy systems, transportation, utilities, and urban infrastructure, Parun supports clients through every phase.

## Research Management

Parun provides research management services designed to support the planning, execution, and dissemination of high-quality research across various sectors. From project design and grant proposal development to data analysis, monitoring, and reporting, Parun ensures that each research initiative is strategically aligned with client goals and adheres to ethical and regulatory standards.

## Training & Capacity Building

At Parun, we believe that sustainable development and organizational excellence begin with empowered individuals and capable institutions. Our Training and Capacity Building services are designed to equip professionals, teams, and organizations with the skills, tools, and strategies they need to excel in a rapidly evolving environment.

# OUR PROJECTS

## Research Management

Parun has facilitated a series of strategic meetings on behalf of the Stratum Institute of New York focused on Afghanistan's copper mineral sector. These meetings brought together key stakeholders, including representatives from relevant government entities, private sector leaders, and academic experts from Kabul University.

## Technical Assistance-Energy

Parun is a consultant firm to State Corps-Strong Builders an Afghanistan leading Energy and Construction company. Parun is facilitating investment attraction into energy sector of the country, which are implementing through State Corps.

## Energy Projects Coordination

Parun played a coordination role of five energy infrastructure projects at Kabul; 500KVa reactor bay in Arghandi substation, 220Kva Transmission line from Arghandi to Buthkhak, Trakhail substaion and others , Parun was at the heart of it all—driving the transition between the the public and private stakeholders in Afghanistan.

## Mining Exploration

Parun is currently leading the mining and exploration efforts for the Gardab Mining large scale concession. Through this project, Parun is overseeing geological assessments, feasibility studies, and operational planning to unlock the potential of the Gardab Nephrite mining concessions.
